## Busy 2011 for Events Team

### Bose Quality Audio Systems

This year our Event Teams introduction of Bose quality speaker systems to a number of prestigious customers brought a new dimension of sound and clarity to Golf and Tennis events. We received numerous compliments from organisers and sponsors which will encourage our expansion with these products.

### Leading Equestrian Event

Concluding the equestrian year our Events Team again provided Burghley Horse Trials with communication networks for administration, fence judges, vets and safety services. Our attention to detail still stands us in good stead with a customer of some 30 years and we look forward to introducing new innovative products along with the latest digital technology.

### AELTC Wimbledon

The Championships used 160 courtesy cars along with control despatcher infrastructure to ensure a speedy service for the Wimbledon players and families during the Championships. Onsite backup services were also provided.

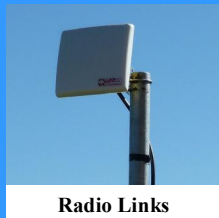

## 2012 Olympic Year Bookings

Additional bookings for the already busy 2012 summer period are expected to deplete radio hire stocks. Although Onsite's procurement of digital equipment is at an all time high, we do expect a supply and demand problem. Have you reserved your equipment for 2012? It's still not too late to contact our Events Department.
